COMPANY EXPERIENCE

How It Works for Companies

Claiming an Existing Company

1. **Find Your Company**

2. **Click "Claim This Company"**

3. **Verification**

4. **Admin Review**

> **Multiple Claims:** If a company already has a pending claim from someone else, you can still submit your own. The admin decides who to approve. A "Claim in review" label is shown alongside the claim button.

Listing a New Company

> **Note:** Company representatives do not have direct editing access to company profiles. All company data is managed by the platform admin in communication with the representative. This ensures quality control and consistency.
