PLATFORM GUIDE

People in Tech.

Greece's premier talent discovery platform connecting tech professionals with the companies shaping the future of the Greek tech ecosystem.

Version 1.0 April 2026 Prepared for Venture Friends

OVERVIEW

What is People in Tech?

A curated discovery platform where tech companies in Greece showcase their teams, culture, and open roles — and where tech professionals build profiles, follow companies, and express interest in opportunities.

CANDIDATE EXPERIENCE

How It Works for Candidates

The journey from sign-up to expressing interest in a role.

1. Registration & Onboarding

1. **Create Account**
   Sign up with name, email, and password. A verification email is sent — click the link to activate your account.

2. **Onboarding Wizard — About You**
   Enter your professional headline, experience level (from Student to Executive), and LinkedIn URL.

3. **Onboarding Wizard — Skills & Interests**
   Select up to 5 role interests, add your skills (95+ predefined + custom), pick industries and preferred locations.

4. **Onboarding Wizard — Preferences**
   Choose email notification preferences: weekly digest, event announcements, and newsletter.

5. **Start Discovering**
   You land on the Discover page — browse companies, follow them, and explore open roles.

2. Discover Companies

The main hub for browsing the platform. Search by company name and narrow down with filters:

FILTER	WHAT IT DOES
Industry	FinTech, SaaS, HealthTech, AI/ML, and 12 more sectors
Location	Athens, Thessaloniki, Patras, Heraklion, Remote, and more
Company Size	Small (1-50) through Enterprise (1000+)
Has Open Roles	Only show companies actively hiring
Verified	Only companies with a confirmed representative
VC Funded	Only venture-backed companies

Company cards display:

3. Company Profiles

Each company has a rich profile page with four tabs:

The hero section shows the company's representative (name, title, LinkedIn) for verified companies, a follow button with live follower count, and links to the company website and LinkedIn.

4. Jobs

Browse all active roles across the platform. Search by title or company, filter by job type (Remote, Hybrid, On-site), and sort by date or company name.

> **Auth Gate:** Anonymous visitors can preview the first 6 jobs. Signing up unlocks the full listing.

5. Events

Browse upcoming and past tech events — workshops, meetups, webinars. Filter by type, date range, and online/in-person. Save events and register directly from the platform.

6. Candidate Dashboard

A personal hub with four tabs:

7. Candidate Profile

Candidates can build a comprehensive profile through the profile editor:

SECTION	WHAT YOU ADD
About	Name, bio, public title, avatar, LinkedIn, website
Availability	Open to work / Not looking / Open to freelance, preferred work type
Skills	Technical and professional skills, role interests, industries, locations
Experience	Work history with company, role, dates, description
Education	Degrees with institution, field, and years
Certifications	Professional certifications with issuer and year
Languages	Spoken languages with proficiency level
CV	Upload a resume file
Visibility	Toggle profile public or private

A completeness meter shows progress and highlights missing sections. The profile can be previewed as others would see it.

COMPANY EXPERIENCE

How It Works for Companies

Companies can claim their page or request a new listing.

Claiming an Existing Company

1. **Find Your Company**
   Search for your company on the Discover page and visit the profile.

2. **Click "Claim This Company"**
   A form asks for your name, job title, work email, and optionally your LinkedIn and a message.

3. **Verification**
   If you're logged in, the claim is submitted directly. If not, a verification email is sent to your work email — click the link to confirm.

4. **Admin Review**
   The platform admin reviews and approves or rejects the claim. On approval, the company becomes verified and shows your info as representative.

> **Multiple Claims:** If a company already has a pending claim from someone else, you can still submit your own. The admin decides who to approve. A "Claim in review" label is shown alongside the claim button.

Listing a New Company

If your company isn't on the platform yet, use the "List Your Company" form. Enter the company name, website, your contact details, and role. The request goes to admin for review.

If a company with the same name already exists, you'll see a warning directing you to claim the existing page instead — preventing duplicates.

> **Note:** Company representatives do not have direct editing access to company profiles. All company data is managed by the platform admin in communication with the representative. This ensures quality control and consistency.

ADMIN GUIDE

Platform Administration

Everything the admin can do from the admin panel at `/admin`.

Dashboard Overview

The admin dashboard shows key metrics at a glance:

Company Management

Full control over all company profiles from the Companies tab.

+

Add & Edit Companies

Create companies manually or edit any existing profile. The edit panel covers: name, description, industry, website, LinkedIn, careers URL, logo, cover image, size, founded year, locations, and technologies.

AI Enrichment

Click the sparkle icon to auto-extract company data from their website — description, logo, LinkedIn URL, and technologies. Review the results before applying.

Job Scraping

Scan a company's careers page for open roles. Supports Greenhouse, Lever, Workable, and generic career pages. Review scraped results and selectively import them as job listings.

Badges & Status

Toggle Featured to highlight a company on the homepage and cards. Toggle VC Funded to show a VC-backed badge. Both are visible across the platform.

Assign Representatives

In the edit panel, scroll to the "Representative" section. Enter the contact person's name, job title, work email, and LinkedIn. Saving sets the company to Verified and shows the representative on the public profile with a green badge.

Claims Queue

The claims queue surfaces three types of requests in one view:

Job Management

View all jobs across the platform. Toggle status between Active and Paused. Click the interest count badge on any job to see which candidates expressed interest — each links to the candidate's full profile.

Candidate Management

Search candidates by name or email. View any candidate's profile — including private profiles. The candidate's **email is shown on their profile** (visible to admin only) for direct outreach. Export the full candidate list to CSV.

Other Admin Features

FEATURE	WHAT IT DOES
Events	Create, edit, and delete platform-wide events (workshops, meetups, webinars)
Partners	Manage partner logos on the homepage — add, reorder, toggle visibility
Content (CMS)	Edit homepage text, hero section, and footer per language (EN/GR)
Newsletter	Create and send newsletters to all subscribers
Analytics	Platform-wide stats: signup trends, skill distribution, top companies

Testing Checklist

Use this to verify every feature on the platform.

Public Pages

- [ ] Homepage loads with hero, companies, jobs, and events sections
- [ ] Discover page loads with company cards, search, and all filters work
- [ ] Featured and VC Funded badges appear on the correct company cards
- [ ] Company profile pages load with all four tabs (About, Roles, Events, Gallery)
- [ ] Verified companies show a green representative badge with name and title
- [ ] Jobs page loads, filters by type, and sorts correctly
- [ ] Events page shows upcoming and past events
- [ ] "List Your Company" form submits successfully
- [ ] Entering a duplicate company name shows a warning instead of creating a duplicate

Authentication

- [ ] Register with name, email, password — receive verification email — verify — onboarding starts
- [ ] Login with email and password works
- [ ] Forgot password sends a reset email — new password can be set
- [ ] Logout clears the session

Candidate Features

- [ ] Onboarding wizard completes all 3 steps and redirects to Discover
- [ ] Dashboard shows saved companies, jobs, alerts, and events
- [ ] Follow and unfollow companies (count updates in real time)

- [ ] Save and unsave jobs and events
- [ ] Express interest on a job detail page — toggle on and off
- [ ] Profile editor saves all sections (about, skills, experience, education, etc.)
- [ ] Profile completeness meter updates as sections are filled
- [ ] Public profile looks correct when viewed by an admin

Company Claims

- [ ] Claim modal opens from a company profile page
- [ ] Logged-in claim submits and shows "Claim Pending" badge
- [ ] Logged-out claim sends a verification email
- [ ] Claim appears in admin Claims Queue
- [ ] Admin can approve and reject claims
- [ ] Listing request appears in admin Claims Queue and can be approved/rejected

Admin Panel

- [ ] Dashboard KPIs show accurate numbers
- [ ] Companies table: add, edit, delete, enrich from website, scrape jobs
- [ ] Representative section in edit sheet: add, save, and remove a representative
- [ ] Featured and VC Funded toggles work and badges appear on Discover
- [ ] Jobs table: view interested candidates, toggle status, delete
- [ ] Candidates table: search, view profiles with email, export CSV
- [ ] Events: create, edit, delete
- [ ] Partners: add, reorder, toggle active
- [ ] Content CMS: edit text per language and save
- [ ] Newsletter: create draft and send

REFERENCE

Page Directory
